

General Parking Lot Rules

Although much of the congestion that happens at the start and end of the school day should be reduced because of the 30 parking stalls we added, there are some “rules” that should be observed to help maximize everyone’s enjoyment and safety while in the parking lot:

1. Traffic around the parking lot is **ONE WAY**. This means that you enter the parking lot on the side farthest from the school building (the east side) and exit along the side closest to the building (the west side).
2. The curb lane next to the school building is only for picking up and dropping off. The maximum “stop time” for private vehicles in this curb lane is **2 MINUTES**. There should not be any unattended private vehicles parked in this curb lane.
3. When stopping in the curb lane to pick up or drop off, please stop as close to the curb as possible. This allows the maximum amount of space for cars to flow past your vehicle.
4. If you expect your planned wait time in the parking lot to exceed 2 minutes, please park your vehicle in a designated parking stall. Designated parking stalls are those with yellow painted lines on **BOTH** sides of your vehicle. Do not stop or park anywhere else as this created unnecessary congestion and can block vehicles attempting to enter or exit proper parking stalls.
5. Although you can enter the student parking lot from either the south or the north access points, there is only one exit – the north one (near the dumpsters). As the sign indicates, do not exit from the south access point (adjacent to the school’s gate).
6. Please refrain from parking in the labelled designated parking spots for wheelchair use and for highest Auction bidders.
