

Light the Way: A Fundraising Gig | October 1 - June 29, 2020

You are invited to participate in our "LIGHT THE WAY" initiative, a fundraiser to upgrade our current fluorescent lights to LED throughout the entire school.

The best part is that we can use our current light fixtures and only need to replace the tubes! This will result in a significant reduction of cost considering each classroom has between 9 and 12 fixtures. Most of our fixtures require 3 tubes. The tubes we selected cost approximately \$12 each, so an entire classroom can be upgraded for around \$400.

When you donate to this initiative, you can even pick the classroom that gets the upgrade! Once you have decided how much to donate, please complete the "Can I Get a Watt, Watt?!" donation form to indicate your wishes and pledge amount. Completed forms are to be submitted to the Business Office.

When everyone participates, this place gets a little brighter. If every family donates just \$100 we would have enough funds to complete the upgrade for the entire school. What a bright idea!

This initiative will result in significant savings on our energy bill (including the lovely carbon tax we are now being assessed) and will be a wise investment in our building and our planet. Let's keep Saskatoon Christian School shining its light in this community, in more ways than one!
